THE FUTURE OF SECURITY

3D Facial Recognition

Anti-panic design
Anti-pabnic function by simply turning the handle for emergency escape.

Wireless lock System
Built in Wifi to unlock and to check the opening records anytime, anywhere.

Semiconductor fingerprint sensor
It requires a real fingerprint-type shape, offering the faster, more accurate and meticulous scanning.

Additional security lock
The electronic locking button is the additional security lock where you can activate the double protection for the smart lock.

NFC Management
Instrall App in the smart phone to implement long distance lock Menagement via NFC.

Lift to double lock system
Lift the lever handle to activate the security deadbolt, enhancing the security of the smart lock.

Phantom password
Support uo to 16 digits phantom password to prevent others easily peep the door lock password.
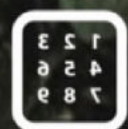

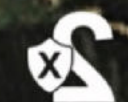

Multifunction door lock for different hospitality solutions
Provide solutions for different hospitality properties such as hotel, residential, Airbnb etc.
