Simple Design

- Easy to Use
- Easy to Program
- Easy to Maintain

Pin Only Access

- Use 4 digits secret code to access
- Multiple sets of code
- Codes Can Be Reprogrammed Easily

Proximity Card Technology

- Easy to Use
- Reliable Technology
- High Durability
- Just Touch the Card to Access

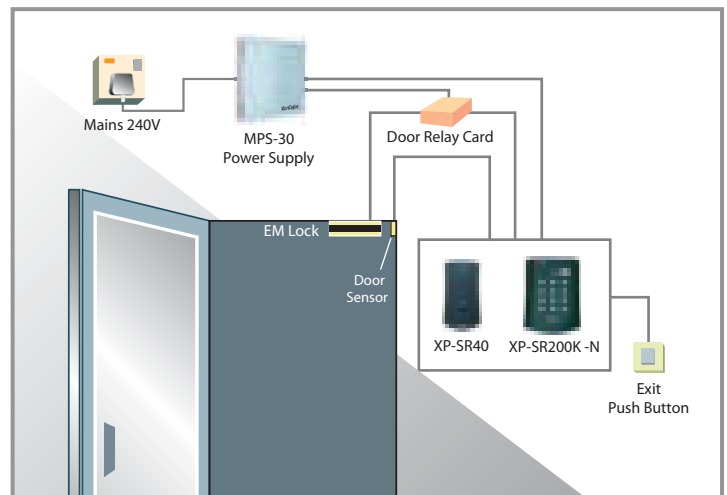

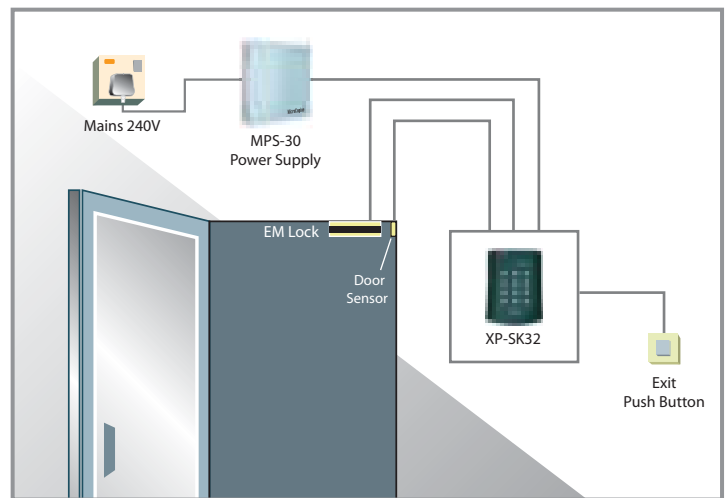

Standalone Architecture

- Easy to Install
- No PC is required to Operate
- LED and Audio Buzzer Indication

Reliable Technology

- Designed with proven and reliable technology
- Built-In System Integrity Monitoring System for maximum reliability

Attendance • Access • Security • Integration

Integrated Security

- Door / Lift / Car Park Access • Alarm Monitoring • CCTV Integration
- Visitor Management • Time Attendance • Guard Tour • Photo Badging

Alarm Monitoring

- Supervised Inputs • Relay Outputs • IO Programming

Car Park Management

- Vehicle Count Control • Car Park Payment Management System

Time Attendance

- Dedicated Unit for Attendance Recording

Connectivity

- RS232 • RS485 • Modem • IP LAN • PoE • SMS • WAN

Established since 2000

www.microengine.net

XP-GT3500L / ABX

FingerPrint Access Control

- Door Access / Time Attendance / Alarm application
- Touch sense keypad with dimming backlight
- Up to 3,500 templates, 10,000 event transactions
- Fingerprint verification time < 1 second
- Up to 100 time sets, 100 time zones, 30 holiday settings
- Access Mode - combination of card (EM / Mifare / CERAS) Pin & fingerprint
- Connectivity - RS485 / LAN
- Graphic LED to display programming menus and controller status
- Built in Real Time Clock with backup battery

**XP-M1000X, XP-SR1000,
XP-GTR1500L / ABX**

Single-Door Access Control

- Door Access / Car Park Access / Time Attendance / Alarm application
- Up to 1,500 card users, 10,000 transactions
- Up to 100 time sets, 100 time zones, 30 holiday settings
- Access Mode - combination of card (EM / Mifare / CERAS) & Pin
- Connectivity - RS485 / LAN
- Easy to configure
- Standalone or PC based operation
- Built in Real Time Clock with backup battery
- Touch Sense keypad (GTR1500L)

Plato Readers

Plato Reader Series

- Slim and stylish design
- Weather proof
- Using RS485 - longer distance (up to 1km away from controller)
- EM / Mifare CSN / CERAS / Mifare Sector Reading
- Better security with 16-digit card numbers
- Hot identification by Card Serial Number for Mifare Sector Reading
- Touch Sense keypad
- Colour LCD
- Stylish LED indicators
- Built-in buzzer

Plato DesFire Readers

Plato DesFire Reader Series

- Slim and stylish design
- Weather proof
- Using RS485 - longer distance (up to 1km away from controller)
- DesFire
- 30-digit Card ID and CSN for DesFire Cards
- Hot Identification by Card Serial Number for DesFire
- Touch Sense keypad
- DesFire Reader with Enhanced Antenna for high power DesFire reading
- Built-in buzzer

Client-Server Based Security Software

- Door Access / Car Park Access / Lift Access / Time Attendance / Alarm application
- Integrated visitor management system
- CCTV integration - event triggered viewing
- Multiple connectivity options - RS485 / LAN / WAN / modem dial up
- Built on Microsoft .NET Framework & supports different Database - ie. SQL, Oracle
- Flexible deployment - web client - application client
- Customisable to cater for non-standard requirements
- Cross platform compatibility - only web browser required to operate
- No special configuration or changes are need on user's PCs
- Lower support and maintenance
- Doing event on web page & online interactive floor plan on web page
- xPortalNet HS - DesFire

xPortalNet HS

Encrypted IP Controllers

- 1/2/5/10 encrypted IP based controller
- Large capacity - up to 100,000 card users, 200,000 event transactions, 1024 doors
- Encrypted IP communication (Push Based)
- 16-digit card numbers for better security
- Built-in supervised inputs
- Supports Door Access, Lift Access, Car Park Access, Alarm Monitoring, Guard Tour & Facility Integration
- Hardware controlled global anti-passback or Peer to Peer Mode
- Multiple door interlocking
- Emergency / fire alarm activated door release
- Web based diagnostic
- On-site firmware upgradable

M1300i

P1000i

M2300i

SNet

GLS130/GLS300

- High Security Controller
- Supports DesFire Pro Readers
- 64 bit Card ID (20-4140)
- Not Identification by Serial Number
- Records both Card ID and Card Serial Number in event log
- 10,000 card users and 30,000 transactions
- Software configurable credential setting
- 10/100 Base LAN

GLS130/GLS300

Other Applications

- Alarm Monitoring System
 - Up to 2048 supervised inputs, 1024 relay outputs
 - Alarm instruction programming
 - Software / hardware anti/duress
 - Scheduled arm / disarm
- High Level Lift/Elevator Interface
 - Smart lobby with high level interlocking to selected elevator brands
 - Integrated access control with traffic management to provide better user satisfaction
 - Configurable mapping for access setting to lift controller

SNET-LID

SNET-E248

SNET-E32R

xPortal3000

Access Control with Time Attendance Software

- Milieu Sector Ready
- Door Access / Lift Access / Time Attendance application
- Supports common office attendance requirements
- New User Interface with built in diagnostics
- Real time / scheduled data export
- Scheduled backup
- User configurable export format to payroll systems
- Configurable software menu access level
- Client Server design, up to 3 clients
- Built on Microsoft .NET Framework
- Multi-Database for ease of managing branches
- Operates on Firebird database engine

**XP-SK32 /
XP-SR200K**

Standalone Access Control

- Wide product range
 - Pin only : XP-SK32 (32 users)
 - Card + Pin : XP-SR200K (200 users)
- Easy to use, easy to program, easy to maintain
- High quality ABS casing with epoxy coated keypad
- Built in polarity protection
- Internal system integrity monitoring
- Reliable and robust design

About MicroEngine

Mifare DesFire

GLS130 / GLS300

Encrypted IP DesFire 1 Door Controller

IP High Security DesFire Controller
IP + Door + Lift + Car Park

- DesFire Encryption
- Card ID Not by Serial Number
- Support Door, Lift and Car Park
- Encrypted IP Messaging
- 32-bit RISC Processor

www.microengine.net

Model No. 100001300

DesFire Support

The controller supports the latest high security card for bringing your system to a higher level of security. Many systems in the market run on older generation of card technology with or without encryption and can be easily cloned. The DesFire card encryption is the latest from Mifare and the encryption is hardened for up to date protection level to your premises.

Card ID Not by Serial Number

- The Card ID is created using the advanced encryption algorithms built in to the Mifare DesFire card. To read the Card ID, the reader needs to perform a few levels of encrypted security exchange. The Card ID obtained by this method is very safe and secured. Some systems in the market only read the Serial Number of the card, which is unprotected or open information. This is not the correct and secured way to use the Mifare DesFire feature.
- The Card ID of our system is 64 bit or 20 digits. This provides the highest security level to your systems. As the security algorithm is very complicated, our readers use 32 bit processor to provide a much faster response time.

Encrypted Messaging

- The messaging between the controller and the computer is encrypted with dynamic keys using the AES 128 industrial strength algorithm. This is to ensure that the controller does not subject to attack from network, especially as the networking environment is very open and sometimes difficult to police.
- The messaging between the readers and the controller is also encrypted to ensure that the communication is secured.
- The card reading is done by encrypted exchanges with the implementation of advanced DesFire encryption algorithm.

Supports Door & Lift

- The controller has been built for high-end integrated security applications. It can support door access control, car park access control and lift access control.
- You can configure the capacity of the system by adding extension boards.

32-bit Processor

The controller uses the 32-bit RISC processor at 80MHz. This is a powerful processor for industrial applications and it enables the system to process complex applications such as modern security encryption features in real-time manner.

Housed in Strong ABS Casing

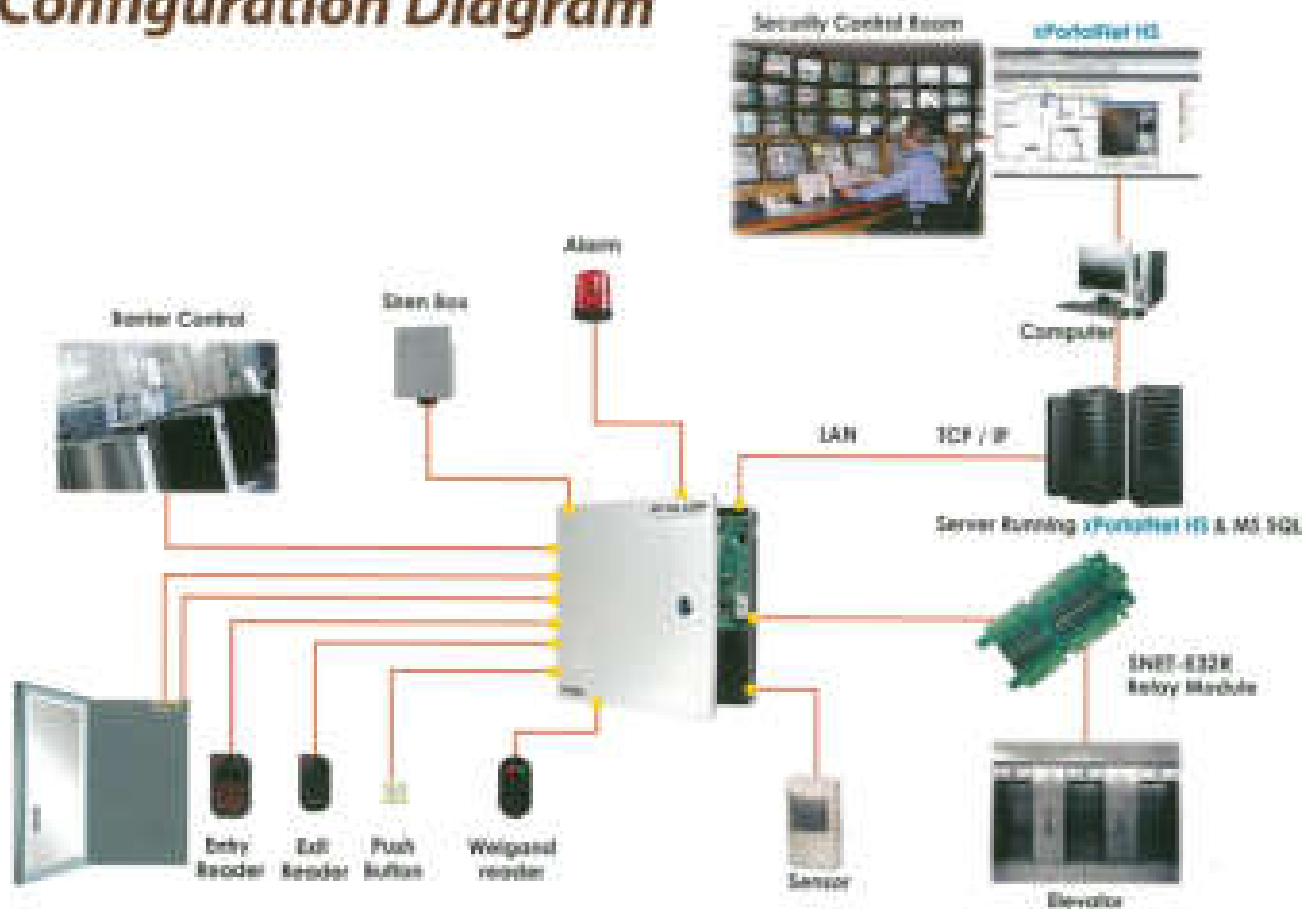

- The controller is housed in a strong ABS casing. This casing is wall mount ready by using the screws to mount it directly on the wall.
- It is also DIN rail mount ready if you wish to mount it this way together with your industrial equipments.

Live Remote Firmware Download

Firmware can be downloaded live from the application software via the IP interface. This helps to improve the maintainability of the controller at site. You can update or upgrade the firmware from the computer at site without needing to open the controller box or bring the controller back for service.

Configuration Diagram

SNET-E32R

SNET-E32R - 32 Relay Output Module

Add support for 32 access control system

No.	Item	Feature
1	Relay Output	32 Relay Output - 1M
2	Overload/Short Protection	Yes
3	Power Requirement	12V @ 2A
4	Communication	RS485

www.microengine.net

Modular System - Extension Board Based

The system is designed to allow you to extend the capacity by simply adding extension boards onto it. This gives you the cost advantage when you are implementing minor capacity upgrades. Moreover, the extension board based design provides a consistent architecture in the system and this promotes better maintenance quality by reducing the system leaving time.

Centralised Connection

- The cables are terminated in the controller. This allows faster data processing as transfer of data are all done onboard and the readers are directly connected to the controller.
- Centralised connection also promotes better deployment and maintenance quality. The engineers can perform the inspection and service all at one place and this can help to reduce the cost of maintenance operations.

Configurable to Distributed Architecture

- Where remote interfacing of door / reader or I/O are required, the controller supports these remote interfacing modules (RIM) that connect to the controller using RS485.
- This is a flexible and powerful controller capability that gives you the benefit of both useful centralised and distributed architecture in one box.

Supports Door, Lift, Alarm Monitoring

- The controller has been built for high-end integrated security applications. It can support door access control, car park access control, lift access control and alarm monitoring.
- You can configure the capacity of the system by adding extension boards or remote interfacing modules.

32-bit ARM Processor

- The controller uses the 32-bit **ARM** RISC dual-core processor at 720MHz. This is a powerful processor for industrial applications and it enables the system to process the complex applications in real-time manner.

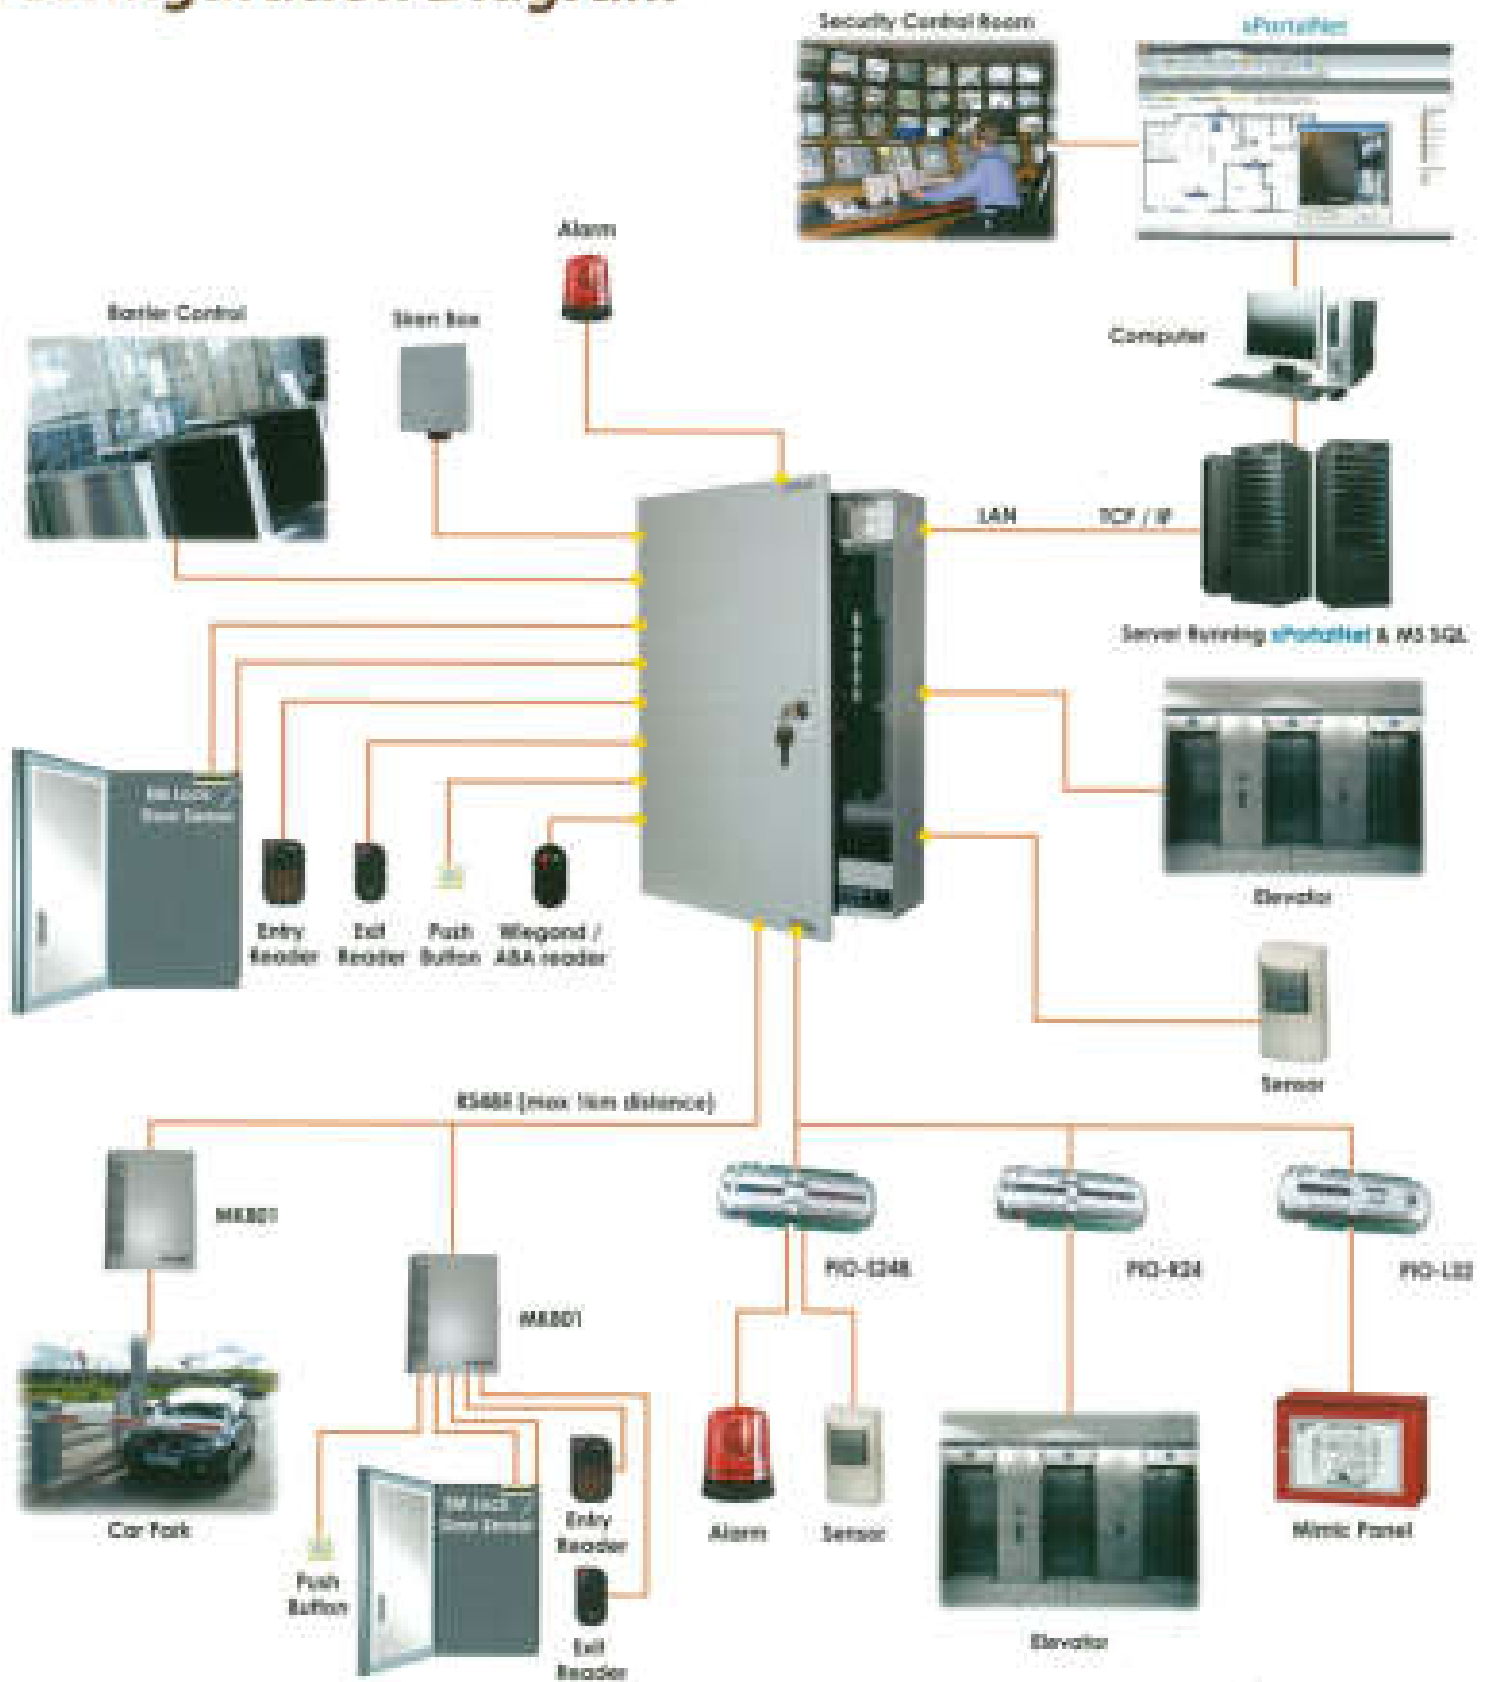

Onboard IP with Encryption

- The controller is equipped with LAN connectivity at 10/100 Base-T using TCP/IP protocol.
- It supports push based communication to computer for faster data transfer speed.
- The IP communication is encrypted using industrial standard AES128 for secured communication.

Remote Firmware Download

Firmware can be downloaded from the application software via the IP interface. This helps to improve the maintainability of the controller at site. You can update or upgrade the firmware from the computer at site without needing to open the controller box or bring the controller back for service.

Configuration Diagram

SNet V4 Features

SNet 5 Base Controller 		
No.	Item	Features
1	Max Flows	5
2	Relay Output	8/5 for Door Relay + 3 General Purpose Relay Rating: 1A
3	Sensor Input	14 Supervised (24 Door Status in Derived Position)
4	IP	Yes - 10V 100 Base T
5	Beacon	• Beacon Plus Beacon (Max 100 Beams + 8 Audit) • 4800pts / 480 Beams (Max 5)
6	Control Port	Yes • RS485 to Remote Interface Module • RS485 to Extension Boards with Output Mirroring
7	Card Number Length	Up to 16 Digits
8	Max Card ID	21,000 / 50,000 / 100,000*
9	Max Transactions/D	100,000 / 100,000 / 100,000*
10	Time Zone	100
11	Time Out	255
12	Multi Access Group	Yes 8 Access Group per Card Number
13	Door Zone	255
14	Global Area Password	Yes
15	Interlocking	Yes
16	Access Mode	1. Card + Pin 2. Card Only 3. Pin Only 4. Facility Code 5. Proximity Only 6. Card + Proximity 7. Pin + Proximity 8. Automatic Lock Release 9. Inhibit Access
17	IP Messaging Integration	Yes - ASCII
18	Alarm Monitoring Support	Yes
19	Extension	Up to 4 Extension Boards EM-150 - 15 Door Extension Board EM-128 - 32 Relay Output Board EM-140 - 24 Supervised Input & 8 Relay Output Board (Max Extension: 2400/121) 1200pts / 120 Inputs / 120 Outputs
20	Support Remote Interface Module	Yes - Use RS485 Door Interface Unit (Max 10), 4800pts Beacon Interface IO Controller (Max 10): FD-028 - 24 Supervised Input / 8 Output FD-024 - 24 Relay Output FD-132 - 32 LED Drive for Motor Panel Use Max Remote Capacity: 10 Doors / 160 Inputs / 160 Outputs
21	Processor	ARM FOC Dual-Core Processor at 1.2GHz
22	Power Requirement	10V @ 100mA (Base Board Only)

Dimension	100mm (H) x 100mm (W) x 10mm (D)

Sim Card Reader with Touch Sense Keypad & Colour Graphic LCD

Model	Description
PLR01003	Proximity Reader
PLR01004	MIFARE / CONTACT / MIFARE / Smart Card / Proximity Reader
Dimension	100mm (H) x 100mm (W) x 10mm (D)

Remote Interface Module

Flexibly allows you to extend the capacity and distance

Door Interface Unit

MK601

Build remote data interfacing capacity

No.	Item	Feature
1	Control Port	1 RS485 1 RS232C 1 RS485 Reader
2	Relay Output	1 (Relay Rating - 1A)
3	Indicators	2 (LEDs) / 1 (LED) Colourful LED Port for Connecting to Wiegand Reader & Wiegand / ABA Port for Connecting to Exit Field Reader
4	Onboard Surge Suppressor	Yes
5	LED Indicator	Yes
6	Power Requirement	12V @ 0.5A

I/O Controller

PIO-L32

32 Relay Power I/O Door Module

No.	Item	Feature
1	Control Port	1 RS485 (to Controller)
2	LED Driver Outputs	32 (0-5V)
3	Digital Input	2 (for Interlocking with Exit Controller)
4	Onboard Surge Suppressor	Yes
5	LED Indicator	Yes
6	Power Requirement	12V @ 0.5A

PIO-S248

Multi Purpose Alarm Panel
24 to 8 DED Modules

No.	Item	Feature
1	Control Port	1 RS485 (to Controller)
2	Relay Output	24 Able to drive fire being triggered, cut or triggered
3	Relay Output	2 (Relay Rating - 1A)
4	Onboard Surge Suppressor	Yes
5	LED Indicator	Yes
6	Power Requirement	12V @ 0.5A

PIO-R24

24 Relay Output Module

No.	Item	Feature
1	Control Port	1 RS485 (to Controller)
2	Relay Output	24 (Relay Rating - 1A)
3	Onboard Surge Suppressor	Yes
4	LED Indicator	Yes
5	Power Requirement	12V @ 0.5A

xPortalNet v1.7 Security Management Software System

Main Features

No.	Item	Features
1	Door Sensor	Yes - Open/Close
2	System	Door Access / Lift Access / Car Park / Alarm Monitoring / Guard Tour
3	Card Reader	20,000 (in Digital)
4	No. of Door / Reader	1024 Doors / 1048 Readers
5	No. of Input / Outputs	1024 Inputs / 1024 Outputs
6	Time Set / Time Zone	1024
7	System Status	Unlimited
8	Software Access Control	Yes - User Configurable Command Level Access Control
9	Alarm Panel System	Yes - Dynamic & user Configurable
10	Database Supported	MS SQL Server / Oracle
11	OS	+ Microsoft Windows XP / Windows 8 Pro + Windows Server 2008 / 2008 R2 / 2012 (R2) etc.
12	Microsoft .Net	Yes
13	Communication Supported	RS232 / RS485 / Modbus / UDP / TCP / HTTP
14	Controller Supported	+ Other - IP 3rd Door with Alarm Monitoring Flexible Architecture Controller + P1000 - Encrypted IP Full 1 Door Controller + M1000 - Encrypted IP 1 Door Controller + S0000 - Encrypted IP 2 Door Controller + Q101000 - IP Single Door Card Reader Controller + Q10000 - IP Single Door Fingerprint + Card Reader Controller
15	Time Attendance	Yes - Non-Overnight
16	Real Time Alarm	Yes - User Configurable
17	Module	+ Parallel VISA I/O, IP Controller VISA I/O, Parallel VISA I/O, Parallel VISA I/O
18	Web Based	User of PortalWEB with Full Web Based UI and Online Monitoring Screen

Add On Modules Features

No.	Item	Features
1	CCTV Integration	With Main Board DVR / NVR + Interaction Based Live Video Playback + Alarm Sensing Trigger of DVR / NVR Based on Configurable Transitions + Video Access Flow Plan + Secure Video through System Transitions Log
2	Guard Tour	Online Guard Tour System + USB Routes Using Reader / Input Ports + Alarm Generation
3	Visitor Management System	Visitor Tracking + Multi-Client Software for Visitor Registration and Tracking + Online Visitor Green / Yellow / Red / Alarm + Interlocking with Reader / Fingerprint Reader + Camera / Scanner Capture System + Alarm Panel + Badge Capt from Card Reader with + User Sign Out + Transaction Report
4	Photo Badging System	+ Photo Badge Design / Template Creation + Automatic Photo Badge Image Capture by Card Reader Info
5	Mobile Access System	+ Special Application of Different Computer + Real Time & Event Log with a Mobile Server
6	User Partitioning	OS / User Partition Management by System User
7	Web Time Attendance	+ Web Browser Interface + User Management / through Web Browser

* The features listed here are for the software only. It is subject to the choice of the hardware system such as controller, I/O board, scanner and computer system for it to work. Kindly contact us to get further information for further configurations.

Ordering Information

No.	Item	Features
1	SP-10421-04	IP 1 Door Door Controller
2	SP-10421-04	IP 10 Door Door Controller
3	SP-10421-02	1 Door Extension Board
4	SP-10421-010	10 Relay Output Extension Board
5	SP-10421-0100	10 Supervised Input / 8 Relay Output Extension Board
6	PC-1048	10 Supervised Input / 8 Relay Output Module for Alarm Monitoring
7	PC-104	10 Relay Output Module
8	PC-104	10 USB Driver Output Module for Alarm Panel
9	MS001	Door Interface Unit
10	Pass-1002	Proximity Reader
11	Pass-10001	Proximity Reader with Touch Screen Keypad and Police LCD
12	Pass-10004	Mifare / CPU16 / Mifare Secure Reading Reader
13	Pass-10003	Mifare / CPU16 / Mifare Secure Reading Reader with Touch Screen Keypad and Police LCD

No.	Item	Features
14	MPS-100	Power Supply Unit with Charger and Low Power Cost
15	MAL-100040	Barcode 100 Lines 4000cm
16	MAL-100040	Barcode 100 Lines 1000cm
17	MAL-10010	Barcode 100 Lines 100cm
18	MAL-100	Barcode 100 Lines 100cm
19	MFC-100	Emergency Card
20	MFC-100	Mifare Card 100
21	MO-10001010	+ Parallel v1.7 Security Management Software + Multi-Client + Based on .Net Technology
22	MO-100010	+ Parallel Web Based Security Management Software + Web Based + Based on .Net Technology + Full Web Based Interface for System Management

Configuring the System

The system is powerful and highly configurable, kindly contact our representatives to assist you to configure a system that suits your requirements.

Plato Readers

Stylish and high quality card reader that provide flexible connectivity

Sim Card Reader

Model	Description
PLR-1001	Proximity Reader
Dimension	100mm (H) x 57mm (W) x 15mm (D)

Sim Card Reader

Model	Description
PLR-1002	Proximity Reader with Mifare Classic 1K/4K/7K/16K/32K/64K/128K
Dimension	100mm (H) x 57mm (W) x 15mm (D)

Sim Card Reader with Touch Sense Keypad & Colour Graphical LCD

Model	Description
PLR-1003	Proximity Reader
PLR-1004	Proximity Reader with Mifare Classic 1K/4K/7K/16K/32K/64K/128K
Dimension	100mm (H) x 57mm (W) x 15mm (D)

Remote Interface Module

Flexibly allows you to extend the capacity and distance

Door Interface Unit

MK801

Extend remote door interface capacity

No.	Item	Feature
1	Cable Port	1 RJ45 1 Coaxial 1 to Wiegand Reader
2	Relay Output	1 Relay Relay (1A)
3	Reader	2 x Wiegand 26bit Voltage 0-5V for Connecting to Wiegand Reader & Wiegand 1MA for Connecting to 1st Party Reader
4	Overload Surge Suppression	Yes
5	LED Indicator	Yes
6	Power Requirement	12V @ 0.5A

I/O Controller

PIO-L32

32 Relay Power LED Driver Module

No.	Item	Feature
1	Cable Port	1 RJ45 (to Controller)
2	LED Driver Output	32 (20mA)
3	Digital Input	2 (for Interlocking with Key-Switch)
4	Overload Surge Suppression	Yes
5	LED Indicator	Yes
6	Power Requirement	12V @ 0.5A

PIO-5248

Multi Purpose Alarm Panel - 28 IN & Out Module

No.	Item	Feature
1	Cable Port	1 RJ45 (to Controller)
2	Relay Output	24 8MA to 20MA (for Relay Interlocking), rest as triggered
3	Relay Output	8 (Relay Relay 1A)
4	Overload Surge Suppression	Yes
5	LED Indicator	Yes
6	Power Requirement	12V @ 0.5A

PIO-R24

24 Relay Output Module

No.	Item	Feature
1	Cable Port	1 RJ45 (to Controller)
2	Relay Output	24 (Relay Relay 1A)
3	Overload Surge Suppression	Yes
4	LED Indicator	Yes
5	Power Requirement	12V @ 0.5A

M-Series IP Controller

No.	Features	IP-M1000	IP-M2000
1	Model Name	1000	2000
2	No. of Readers	Max 2 Readers (Photo Reader + 1 Proxy + 1 Exit)	Max 4 Readers (Photo Reader) + 2 Proxy + 2 Exit
3	Supported IAS Reader	Yes - Max 2	
4	Connection to PC	IP LAN (10/100 Base-T) + RS485	
5	Connection to Reader	RS485 - Photo Reader Series + Wiegand/RS485	
6	Card Types	10,000 (76 types)	
7	System Size	50,000	
8	Time Setting	255 Time-out & 255 Time-Zone (All Areas Level Limit)	
9	Memory	512K Bytes	
10	Input	3 Supervised Digital (Deactivated) - 1 Door Sensor + 1 Exit Button, 1 Deactivated Fire Alarm Input, 2 Configurable as Reader Tamper, Emergency Breakglass Monitor in General Purpose	10 Supervised Digital (Deactivated) - 3 Door Sensors + 2 Exit Buttons, 1 Deactivated Fire Alarm Input, 3 Configurable as Reader Tamper, Emergency Breakglass Monitor in General Purpose
11	Exit Relay Outputs	1	1
12	Event Relay Outputs	Yes (2) - Configurable	Yes (2) - Configurable
13	Emergency IP	Yes - RS485	
14	Close Area Feedback	Yes - via Max GAC	
15	Real Time Clock	Yes - 32768 On Board Battery	
16	WAN Support	No - Support Dynamic IP	
17	Power Fail Monitor	Yes - with Power Loss Warning	
18	Firmware Upgrade	Download from Computer	
19	Diagnosis	Yes - Using Built-in Web Browser	
20	Optional LED Indicators	Yes - Input, Output, Run, Diagnosis, Error	
21	Optional Beep	Yes	
22	Use with other Wiegand Connectors	Yes	
23	Powerful	Memory 512K - 32 GB (RS485) / 128 MB (IP)	
24	Memory	Program (128K) - 21,818 Bytes (4 Tr. RS485) / 1,024 Bytes (4MB)	
25	PCF Board Dimension	160mm (2) x 100mm (2)	
26	Casing Dimension	110mm (H) x 227mm (W) x 75mm (D)	110mm (H) x 220mm (W) x 80mm (D)
27	Panel Connection	Typically 60 pins (4 pins for RS485) / 10 pins (2 pins for RS485)

Plato - P80KLS / C80KLS
Slim Reader with Touch Sense
Keypad, Colour Graphic LCD

Plato - P80S / C80S / C80MS
Slim Reader

XP-GT3500L / GT3500ABL
Reader with Touch Sense Keypad,
Fingerprint, LCD & Built-in
Controller & LAN

XP-GTR1500L / GTR1500ABL
Reader with Touch Sense Keypad,
LCD & Built-in Controller & LAN

XP-M1000X / M1000ABX
Reader with Keypad,
LCD & Built-in Controller

System Supporting Features

Hardware

- Proximity / Mifare / Mifare Sector Reading Technology
- Reader Unit with LCD & Keypad (Colour LCD Keypad Available - Plato)
- Built-in Controller Function for Memory & Time Control
- Supports Exit Reader Unit
- Supports External I/O for Interfacing with CCTV / Stems
- Keep Transactions Data even Power fails
- Encrypted IP Controller
- Can Program Directly at the Reader Keypad (or from PC Software)
- Can be linked to PC through LAN / Direct Serial / RS485

Software

- Supports Time Set & Time Zones
- Supports Transaction Recording
- Supports Transaction Memory Retention
- Can Program Directly at the PC Software (or the Reader Keypad)
- «Portal3000» Software with Access Management Automatic
Data Collection, Time Attendance Function, Client-Server Version Available
- Server Runs as a Windows Service
- Multi-Language

Time Attendance

- Designate Specific Reader for Attendance
- Supports Attendance Done Group by Staff
- Configurable Export for Integration with Payroll System
- Configurable Shift Setting
- Supports Flexi Hour

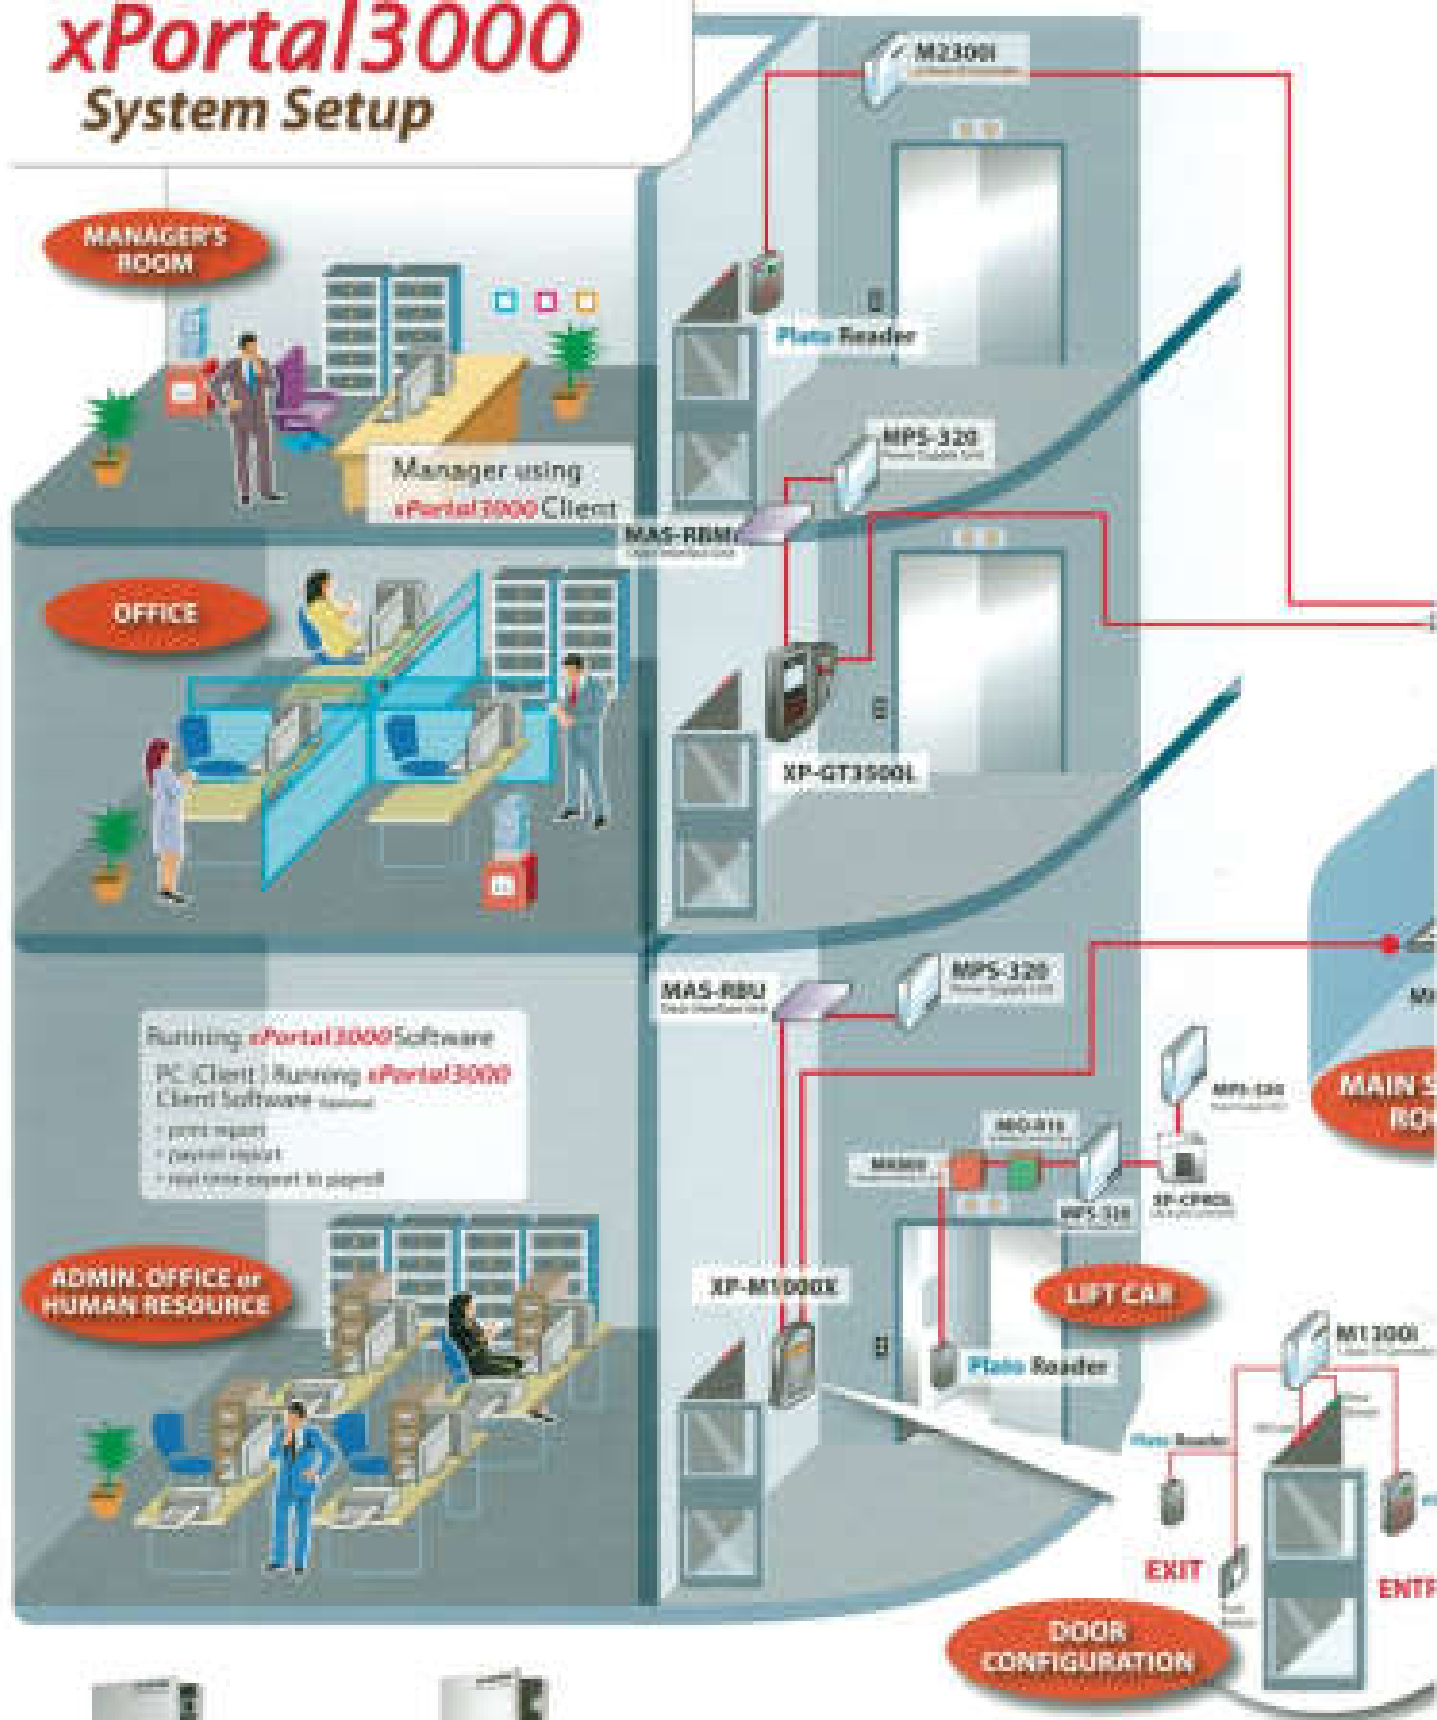

Car Park

- Supports 1 IN and 1 OUT Reader
- Supports Car Park Vehicle Counting and Control
- Supports Car Park Full Sign Activation

Fingerprint

- Reliable Optical Fingerprint Sensor
- Supports Up to 3500 Templates
- Can be Used Together with Card Access System with Same Software
- Multiple Operating Modes - Fingerprint + Card + Pin Codes
